## Модифицированные приборы Nivovent 85 RE Buhler

# Nivovent 85 RE with Thermotronic 71

- RENAULT specification -

**easyjust**

The Nivotemp 85 RE featuring the Bühler “easyjust” technology is a compact economic combination of level switch and precise temperature control with LED display. The unit provides two temperature alarm/switch outputs in addition to two level contacts.

The “easyjust” system simplifies the adjustment of the level contacts. The system consists of level contact cartridges that clip onto a gold plated contact board which incorporates the Pt100 temperature sensor.

Both the level contacts and temperature controls clip directly onto the contact board thus eliminating wiring.

The unit has a DIN 24557 flange for easy installation and a variety of electrical terminations. The device can be easily be replaced or adopted to a variety of applications due to the solderless connection between terminal block and contact board.

The breather/filter type is a Hydac BF 7 / -CNOMO, released by Renault

The Nivovent 85RE in this configuration complies with the Renault requirements. It provides two M12 connector sockets, a temperature display, preset level contacts and a stilling tube. The unit must be completed with an breather filter according to Renaults specs.

Please note that our programme contains more Renault specific versions of the Nivotemp and Nivovent series.

### General Description of Thermotronic 71

The Thermotronic 71 is a combined microprocessor controlled digital display and control unit for monitoring and stabilizing the operating temperature in fluid power systems.

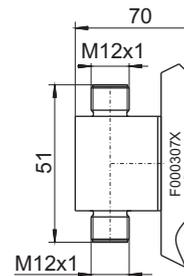

The actual temperature is displayed on a high visibility LED display. The status of the entire unit (output, sensor, broken wire) is indicated by separate LED's. The value can be set to Celsius or Fahrenheit.

Programming is by touch keys. The settings are protected against unauthorized operation by key lock.
